## NORTHERN MINING HIGHLIGHTS

The Oil and Mineral Division of the Department of Indian and Northern Affairs is adding a new feature, "Northern Mining Highlights", with this issue of "Mine and Minerals Statistics".

This new feature, to be issued quarterly, will contain items of interest on exploration, development and production, geological field programs, mine rescue training, issue of prospecting permits, claim staking and notices of personnel taking up new positions in the northern mining community.

## AVIS

### NOUVELLES SUR LES MINES DU NORD

La Division du pétrole et des minéraux du ministère des Affaires indiennes et du Nord a introduit dans le présent numéro de "Statistiques des mines et des minéraux", une nouvelle chronique intitulée: "Nouvelles sur les mines du Nord".

Cette chronique, qui sera publiée chaque trimestre, englobera les points suivants: l'exploration, la mise en valeur et la production, les travaux géologiques sur le terrain, l'entraînement au sauvetage minier, l'émission des permis de prospection, le jalonnement des concessions et des notes sur les employés qui entrent en fonction dans le secteur minier du Nord.

APRIL - 1974

STATISTIQUES MINIERES  
TERRITOIRES DU NORD-OUEST  
D'AVRIL - 1974

1. SUMMARY

RESUME

(a) Mineral Claims

Claims minières

Mining District	Claims Recorded	Claims Lapsed	Total Good Standing
Région minière	Claims enregistrés	Claims périmés	Total des claims en règle
Mackenzie	988	950	24,459
Arctic & Hudson Bay Arctique et baie d'Hudson	186	-	12,617
Nahanni	75	32	6,475
TOTAL	1,249	982	43,551

(b) Prospector's Licences Sold

Permis de Prospection Délivrés

Mining District	January 1974 to Date Fiscal Year	
Région minière	Janvier 1974 à ce jour année	
Mackenzie	115	486
Arctic & Hudson Bay Arctique et baie d'Hudson	-	129
Nahanni	2	223
TOTAL	117	838

Murray Bond has been appointed Electrical Mechanical Inspector for the Yukon and Northwest Territories. Mr. Bond and his family are residing at Whitehorse, Yukon.

Allan Patrick has been appointed Environmental Control Engineer for the Yukon and Northwest Territories. Mr. Patrick and his family have taken up residence in Yellowknife, N.W.T.

John M. Maloney has joined the Exploration and Geological Service working out of the Whitehorse office under Dr. D.B. Craig, Resident Geologist. Mr. Maloney is a graduate of the University of Ottawa and has worked with Texaco Exploration Canada Ltd. since graduation in 1969. He is responsible for the Yukon area northeast of the Tintina Trench.

A pamphlet entitled "Northern Placer Mining in the Yukon Territory" prepared by G.W. Gilbert is available from the office of the Resident Geologist, Room 211, Federal Bldg., Whitehorse, Yukon. Described are patterns of gravel occurrences containing placer gold, methods of prospecting and mining and reference to the applicable Government Acts and Regulations.

The Department of Indian and Northern Affairs is hosting the 8th Canadian Mine Rescue Championship to be held at Whitehorse, on June 22, 1974. Five Canadian teams from British Columbia, Alberta, Nova Scotia, the Yukon and Northwest Territories will

be competing. In addition, an American coal mine rescue team from Wayland, Kentucky will attend.

Giant Yellowknife Mines Ltd. has commenced stripping operations in preparation for open pit mining of 480,000 tons of ore grading 0.3 ounces gold per ton.

Discovery Mines Ltd. is planning to do additional underground exploratory work on the Camleran Mine at Gordon Lake some 50 miles north of Yellowknife. It is intended to deepen the shaft below the second level and conduct exploratory development on at least two new levels.

Precambrian Shield Resources reports that it has encountered some unexpected but significant gold values in a decline being driven for the purpose of bulk sampling on its N.W.T. gold property 43 miles northeast of Yellowknife.

Stripping of waste from the orebody on the Minto Copper property, Yukon Territory, owned 50-50 by Silver Standard Mines and American Smelting and Refining (Asarco), may start this summer, A.C. Ritchie, newly-elected president of Silver Standard, reports.

Summer field investigations will be made by geological teams of the Exploration and Geological Service in the following areas:

1. Minto area, Yukon 115-I-111 - Dave Sinclair
2. Rankin Inlet area, N.W.T. 55-J-13 - Pierre Laporte
3. Hackett River area, N.W.T. 76-G-12, 13 - Bill Padgham
4. Contwoyto Lake area, N.W.T. 76-E-11 - Walter Gibbin
5. Kognak River area, N.W.T. 65-G-7, 8 - Walter Gibbin

Special studies will be made in the following areas:

- Selwyn and Mackenzie Mountain area. A study of structure and stratigraphy of Proterozoic and Paleozoic rock units - J. Crawford.
- Klondike Gold Field area. A study of present and paleogeomorphology as an aid to the placer mining industry - M. Milner.
- Yellowknife area. Metal dispersion patterns in lake sediments - R. Jackson.
- Dezadeash area of Yukon. Mineral deposit study - D.B. Craig, I. Gibson.
- Nadaleen area, Yukon. Study of structure and stratigraphy of Proterozoic and Paleozoic rock units - D.B. Craig.

### Publication Releases

The following are now available:

- Geological compilation map and notes on White Eagle Falls, 86-F-12, prepared by W.A. Padgham, R.J. Shegelski, J.D. Murphy and C.W. Jefferson.
- Geological compilation map and notes on High Lake, 76-M-7, prepared by W.A. Padgham, C.W. Jefferson, D.R. Hughes, R.J. Shegelski.
- Geological maps at a scale of 1 = 200' and brief descriptive notes of the High Lake copper-zinc deposit, 76-M-7 and of the Indian Mountain Lake zinc-lead-silver-copper deposit, 75-M-2, by W.L. Johnson.
- Mineral occurrence map overlays, matched to published G.S.C. geological maps, prepared in various scales for N.T.S. areas 75, 76, 85 and 86.

Copies of the above may be obtained by applying to the Resident Geologist, Box 1500, Yellowknife, N.W.T. XOE 1H0, Price \$1.00.

An index of technical and scientific reports covering the Yukon and Northwest Territories has been prepared by the Canadian Centre of Geoscience Data and is available to visitors at the offices of the Resident Geologist in Whitehorse, Yellowknife and at Headquarters in Ottawa. The index refers to all Geological

Survey of Canada publications, National Mineral Inventory of Mineral Deposits, and assessment reports on file with the Oil and Gas Section and the Mining Section of the Department of Indian and Northern Affairs.

Northern Mineral Exploration Program - seven applications to date have been received for appraisal by the Exploration and Geological Service, three in the Yukon and four in the Northwest Territories. Companies planning to apply for assistance are asked to discuss their program with the respective Resident Geologist for each territory, Dr. D.B. Craig for the Yukon and Mr. R. Hornal for the N.W.T.

Mineral Identification Courses - Charles Vadik, Instructor for the mineral identification course, has given instruction at Inuvik, Fort MacPherson, Fort Good Hope, Aklavik, Copper Mine and the Belcher Islands. The courses are funded by the Adult Education Division of the N.W.T. Government. The Resident Geologist's office at Yellowknife provides technical assistance.

Thirty-nine prospecting permits were issued this year in the Northwest Territories. Since the start of the program in 1961 a total of 346 of these three-year permits has been issued, providing many companies with an opportunity to do broad-based

reconnaissance type exploration work before selecting preferred areas for staking.

We remind all exploration companies operating in the North that the Department encourages you to contact the native council in the Settlement nearest to your base of operations to make the council aware of your exploration program prior to commencement.

M. Murray Bond a été nommé inspecteur d'électricité et de mécanique au Yukon et dans les Territoires du Nord-Ouest. M. Bond et sa famille habitent Whitehorse (Yukon).

M. Allan Patrick, ingénieur, a été chargé de la protection de l'environnement au Yukon et dans les Territoires du Nord-Ouest. M. Patrick et sa famille ont éli domicile à Yellowknife (T.N.-O.).

M. John Maloney, qui a rejoint le Service de l'exploration et des relevés géologiques, est cependant attaché au bureau de Whitehorse et travaille sous la direction de M. D.B. Craig, géologue en poste. Après avoir obtenu un diplôme de l'Université d'Ottawa en 1969, M. Maloney a travaillé à la Texaco Exploration Canada Ltd. Il est chargé de la partie du Yukon située au nord-est de la tranchée Tintina.

Une brochure intitulée "Northern Placer Mining in the Yukon Territory" et préparée par M. G.W. Gilbert, est disponible au bureau du géologue en poste à Whitehorse (Yukon), soit à la pièce 211 du Federal Bldg. Cette brochure décrit les venues de gravier aurifère ainsi que les méthodes de prospection et d'extraction, et mentionne les articles pertinents des lois et règlements du gouvernement.

Le ministère des Affaires indiennes et du Nord parrainera le 8<sup>e</sup> Championnat canadien de sauvetage minier, qui se tiendra à Whitehorse le 22 juin 1974. Cinq équipes canadiennes en provenance de la Colombie-Britannique, de l'Alberta, de la Nouvelle-Écosse, du Yukon et des Territoires du Nord-Ouest y participeront, de même que l'équipe de sauvetage d'une houillère américaine de Wayland (Kentucky).

La Giant Yellowknife Mines Ltd. a entamé des travaux de décapage afin de préparer l'extraction à ciel ouvert de 480,000 tonnes de minerai accusant une teneur de 0.3 once d'or par tonne.

La Discovery Mines Ltd. se propose d'entreprendre des travaux additionnels d'exploration souterraine à la mine Camleran située à Gordon Lake, à quelque 50 milles au nord de Yellowknife. Il s'agit d'approfondir le puits situé en dessous du deuxième niveau et d'effectuer le traçage d'exploration sur au moins deux nouveaux niveaux.

La Precambrian Shield Resources a annoncé qu'elle a découvert une quantité d'or inattendue, mais importante, dans un puits incliné qu'elle forait en vue d'un échantillonnage en vrac, sur sa concession d'or des T.N.-O., située à 43 milles au nord-est de Yellowknife.

M.A.C. Ritchie, récemment nommé président de la Silver Standard, a annoncé que cette société pourrait entamer au cours de l'été, le décapage du gisement de minerai, sur la propriété de la Minto Copper, située au Yukon et qui appartient à parts égales, à la Silver Standard Mines et à l'American Smelting and Refining (Asarco).

Au cours de l'été, des équipes du Service de l'exploration et des relevés géologiques, entreprendront des enquêtes sur le terrain dans les régions suivantes:

1. Région de Minto (Yukon 115-I-111) - Dave Sinclair.
2. Région de l'inlet Rankin (T.N.-O. 55-J-13) - Pierre Laporte.
3. Région de la rivière Hackett (T.N.-O. 76-G-12, 13) - Bill Padgham.
4. Région du lac Contwoyto (T.N.-O. 76-E-11) - Walter Gibbin.
5. Région de la rivière Kognak (T.N.-O. 65-G-7,8) - Walter Gibbin.

Des études spéciales seront entreprises dans les régions suivantes:

- Région des monts Selwyn et Mackenzie. Étude de la structure et de la stratigraphie des unités rocheuses algonkiennes et paléozoïques - J. Crawford.
- Région du champ aurifère du Klondike. Étude de la géomorphologie actuelle et passée, en vue d'aider l'industrie de l'or placérien - M. Milner.

- Région de Yellowknife. Modes de dispersion des métaux dans les sédiments lacustres - R. Jackson.
- Région de Dezadeash (Yukon). Étude des gisements de minéraux - D.B. Craig, I. Gibson.
- Région de Nadaleen (Yukon). Étude de la structure et de la stratigraphie des unités rocheuses de l'Algonkien et du Paléozoïque - D.B. Craig.

#### Publications

Les publications suivantes sont actuellement disponibles:

- Geological Compilation map and notes on White Eagle Falls, 86-F-12, préparée par W.A. Padgham, R.J. Shegelski, J.D. Murphy et C.W. Jefferson.
- Geological Compilation map and notes on High Lake, 76-M-7, préparée par W.A. Padgham, C.W. Jefferson, D.R. Hughes, R.J. Shegelski.
- Geological maps at a scale of 1" = 200' and brief descriptive notes of the High Lake copper-zinc deposit, 76-M-7 and of the Indian Mountain Lake zinc-lead-silver-copper deposit, 75-M-2, par W.L. Johnson.
- Mineral occurrence map overlays, matched to published G.S.C. geological maps, préparé à diverses échelles pour les coupures S.N.R.C. 75, 76, 85 et 86.

Des exemplaires de ces publications peuvent être obtenus du géologue en poste, dont l'adresse est la suivante: Boîte postale 1500, Yellowknife (T.N.-O.), XOE 1H0. Le prix de chaque exemplaire est de un dollar.

Le Centre canadien des données géoscientifiques a préparé un index des rapports techniques et scientifiques sur le Yukon et les Territoires du Nord-Ouest; les visiteurs peuvent <sup>se</sup> procurer un exemplaire de cet index aux bureaux des géologues en poste à Whitehorse et à Yellowknife, ainsi qu'au bureau central d'Ottawa. L'index mentionne toutes les publications de la Commission géologique du Canada, les gisements de minéraux de l'Inventaire national des minéraux et les rapports d'évaluation classés par la Section du pétrole et des minéraux et par la Section des Mines, du ministère des Affaires indiennes et du Nord.

Programme d'exploration minière dans le Nord - Jusqu'à ce jour, sept demandes ont été soumises au Service de l'exploration et des relevés géologiques; trois d'entre elles concernent le Yukon et les quatre autres, les Territoires du Nord-Ouest. Les sociétés qui se proposent de demander une aide, sont priées de discuter de leur

programme avec le géologue en poste désigné pour chaque territoire, soit, M. D.B. Craig pour le Yukon et M. R. Hornal pour les T.N.-O.

Cours d'identification des minéraux - M. Charles Vadick, instructeur pour le Cours d'identification des minéraux, a dispensé son enseignement à Inuvik, à Fort McPherson, à Fort Good Hope, à Aklavik, à Coppermine et aux îles Belcher. Les cours sont financés par la Division de la formation des adultes, du gouvernement des T.N.-O. L'aide technique est fournie par le bureau du géologue en poste à Yellowknife.

Au cours de l'année, trente-neuf permis de prospection ont été délivrés dans les Territoires du Nord-Ouest. Depuis le début du programme, en 1961, un total de 346 de ces permis triennaux ont été émis, ce qui a fourni aux sociétés l'occasion de procéder à des travaux de reconnaissance générale, avant de choisir les zones favorables au jalonement.

Nous rappelons aux sociétés qui travaillent dans le Nord, que le Ministère les encourage à prendre contact avec le Conseil d'autochtones de l'agglomération la plus rapprochée de la base des travaux, afin de le mettre au courant du programme d'exploration qu'elles projettent de mettre sur pied.

### EIGHTH CANADIAN MINE RESCUE COMPETITION

Eldorado Nuclear, representing Saskatchewan, won the Eighth Canadian Mine Rescue Competition held in Whitehorse on June 22.

In capturing trophies donated by the Mining Association of British Columbia and the United Steelworkers of America, the Eldorado rescue squad defeated five other teams in an all-day event attended by 200 persons.

The winner was announced and trophies presented at a dinner following the competition.

James Smith, commissioner, Yukon Territory, presented the awards to the Eldorado team, which included R. Wiltshire, A. Dillabough, S. Gibson, E. Benesch, E. Rath, W. Melnychuk and E. Mitchell.

The other competing teams were from the Coleman Mine, Alberta; Pinchi Lake Mine, British Columbia; Giant Yellowknife Mines, Northwest Territories; United Keno Hill Mines, Yukon, and Cape Breton Development Corp., Nova Scotia.

Each team had to solve the same problem in the competition, performing with regulation equipment in a simulated underground mine constructed on surface from scantlings and sackcloth and consisting of a number of crosscuts and drifts.

Each team required approximately an hour to deal with a mine disaster problem. They were judged on the basis of efficiency and their knowledge and conduct of tests and procedures to follow in mine rescue recovery operations.

A seventh team participated in the event, but not on a competitive basis. This was the mine rescue squad from the coal mine of the Stinson Mines, East Kentucky, which was here to observe Canadian Mine rescue methods. Heading the team was John Collins, safety director, Stinson Mines. A visitor with the team was Thomas Mark, sub-district manager, United States Mining Safety and Enforcement Administration, Barbourville, Kentucky.

Among other important visitors were B.C. Mines Minister Leo Nimsick, Jim Tough, President, and Bob Matthew, Manager, Mining Association of British Columbia, and Steve Homulos Indian Affairs and Northern Development, Ottawa.

This was the first year the competition was held in the Yukon. Each year the location of the event is changed, the site being decided by the Chief Mines Inspectors of the provinces and territories at their annual meetings. This year the competition, designed to promote mine safety, exchange of information and to improve techniques, was sponsored by the Department of Indian Affairs and Northern Development.

The committee was headed by B. J. Trevor, Regional Director, Indian Affairs and Northern Development. Chief Advisor for the competition was Stephen Homulos, Chief Mining Engineer of the Department of Indian and Northern Affairs. Other committee members included Tibor Csizmazia, Vice-Chairman of the Committee; Gerry Needham, Regional Mines Inspector, John Barraclough, Mine Rescue Superintendent; B.R. Baxter, Supervising Mining Recorder, and Art Mones of the Financial Section and Ross Mack of the Regional Directors Office, all of Indian Affairs and Northern Development; Vic Jutronich, General Manager, Whitehorse Copper Mines; R.E (Dutch) Van Tassell, Exploration Superintendent, United Keno Hill Mines; and J. Guldner, Tourist and Publicity Department, Territorial Government.

### GEOSCIENCE FORUMS

Geoscience forums will be held in Whitehorse on December 10, 1974 and in Yellowknife on the afternoon of December 12 and the morning of the 13, 1974. The forums are sponsored by the Mining Section, Department of Indian and Northern Affairs and the Geological Survey of Canada, Department of Energy, Mines and Resources. These meetings will be held with the co-operation of the Yukon Chamber of Mines and the Northwest Territories Chamber of Mines.

### NANISIVIK MINES LIMITED

Under the terms of an agreement signed by Jean Chrétien, former Minister of Indian and Northern Affairs and C. Frank Agar, President of Mineral Resources International, the Federal Government is to invest \$16.7 million toward the opening of a lead-zinc mine on the northern tip of Baffin Island in return for 18 percent of shares of a new Calgary based company, Nanisivik Mines Limited. Nanisivik Mines will develop the lead-zinc deposit at Strathcona Sound and will be the first major mining operation north of the Arctic Circle in Canada. The mine will boost the economy of the Eastern Arctic and provide new employment opportunities for the Innuits in that part of the North.

### EXPLORATION ACTIVITY

Early reports from the field indicate that the summer of 1974 will be one of the most active in recent years for Canada, North of 60°. In the northern Yukon exploration centers around Bonnet Plume Lake, Goz Lake, Pinguicula Lake, Fairchild Lake, Margaret Lake, Hart Lake and off the Dempster Highway. Further South, exploration is centered around the Minto area, the Dawson Range area and the Anvil-Vangorda area.

In the Northwest Territories a wide spread hunt for new mineral occurrences stretches from the Mackenzie Mountains to the Keewatin District and north from the 60th parallel to the high Arctic Islands.

### NORTHERN MINERAL EXPLORATION PROGRAM

Twenty-three applications to date have been received for appraisal by the Exploration and Geological Service; fifteen in the Yukon and eight in the Northwest Territories. Companies planning to apply for assistance are asked to discuss their program with the respective Resident Geologist for each territory, Dr. D.B. Craig for the Yukon and Mr. R.W. Hornal for the N.W.T.

HOPE BAY MINES LIMITED

The property is a very high-grade silver prospect located on 121 contiguous claims, namely the RUS and VAN claims, on the N.W.T. mainland south of Melville Sound. It extends from Ida Point on the north to Roberts' Lake on the south, a distance of five miles, and from Roberts' Bay on the west to Angimayor Sound on the east.

Two adits have been driven on the property, one at Ida Point and the other at Roberts' Lake. There was no work being done on the Ida Point adit. On the Roberts' Lake adit, raises are being driven from the adit level into the ore zone. The milling installations are completed and the company is awaiting approval of the tailings disposal basin by the Water Board prior to commencement of milling operations.

## HUITIÈME CONCOURS CANADIEN DE SAUVETAGE MINIER

L'Eldorado Nuclear, représentant la Saskatchewan, a gagné le Huitième concours canadien de sauvetage minier qui s'est déroulé à Whitehorse le 22 juin.

En décrochant les trophées donnés par l'Association minière de la Colombie-Britannique et par la United Steelworkers of America, l'équipe de sauvetage de l'Eldorado a défait cinq autres équipes au cours d'un événement d'une journée entière auquel 200 personnes ont assisté.

La proclamation du vainqueur et la présentation des trophées ont eu lieu au dîner qui a suivi le concours.

Le commissaire du Yukon, M. James Smith, a présenté les prix à l'équipe de l'Eldorado composée de: MM.R. Wiltshire, A. Dillabough, S. Gibson, E. Benesch, E. Rath, W. Melnychuk et E. Mitchell.

Les autres équipes ont été: la Coleman Mine (Alberta), la Pinchi Lake Mine (Colombie-Britannique), la Giant Yellowknife Mines (Territoires du Nord-Ouest), la United Keno Hill Mines (Yukon) et la Cape Breton Development Corp., (Nouvelle-Écosse).

Le concours obligeait chaque équipe à résoudre le même problème en utilisant le matériel réglementaire dans une mine souterraine simulée, construite en surface, au moyen de madriers et de sacs et comprenant des travers-bancs et des galeries d'avancement.

Chaque équipe devait mettre une heure environ à résoudre un problème de désastre minier. Elles ont été jugées d'après leur efficacité, ainsi que la connaissance et l'exécution des tests et méthodes à suivre dans les opérations de sauvetage minier.

Une septième équipe a participé à l'événement, mais sans concourir. C'était l'équipe de sauvetage minier déléguée par la houillère de la Stinson Mines (Kentucky oriental), pour observer les méthodes canadiennes de sauvetage minier. A la tête de cette équipe se trouvait M. John Collins, directeur du service de sécurité de la Stinson Mines. M. Thomas Mark est venu en visite avec l'équipe; il est administrateur de sous-district de la United States Mining Safety and Enforcement Administration, à Barbourville (Kentucky).

Entre autres visiteurs de marque, il convient de signaler: M. Leo Nimsick, ministre des Mines (C.-B.), MM. Jim Tough et Bob Matthew, respectivement président et administrateur de l'Association minière de la Colombie-Britannique et M. Steve Homulos, du ministère des Affaires indiennes et du Nord canadien (Ottawa).

C'est la première fois que le concours s'est déroulé au Yukon. Chaque année, l'événement se passe en un endroit différent choisi par les inspecteurs en chef des mines, lors de leur réunion annuelle.

Cette année, le concours visait à stimuler la sécurité minière, permettre l'échange de renseignements et améliorer les techniques; il a été patronné par le ministère des Affaires indiennes et du Nord Canadien (Ottawa).

M. B.J. Trevor, directeur régional, du ministère des Affaires indiennes et du Nord canadien, a présidé le comité. Le conseiller en chef du concours a été M. Stephen Homulos, ingénieur minier en chef, du ministère des Affaires indiennes et du Nord Canadien. Les autres membres du comité ont été: MM. Tibor Csizmazia, vice-président du comité, Gerry Needham, inspecteur régional des mines, John Barraclough, superviseur du sauvetage minier, B.R. Baxter, conservateur en chef des registres miniers, Art Mones, de la Section des finances et Ross Mack, du bureau du directeur régional, tous du ministère des Affaires indiennes et du Nord canadien; Vic Jutronich, administrateur général de la Whitehorse Copper Mines; R.E. (Dutch) Van Tassell, superviseur de l'exploration à la United Keno Hill Mines; et J. Guldner, du département du Tourisme et de la Publicité du gouvernement territorial.

## RÉUNIONS GÉOSCIENTIFIQUES

Des réunions géoscientifiques seront tenues à Whitehorse le 10 décembre 1974 et à Yellowknife dans l'après-midi du 12 décembre et dans la matinée du 13 décembre 1974. Elles sont patronnées par la Section des mines du ministère des Affaires indiennes et du Nord et par la Commission géologique du Canada, du ministère de l'Énergie, des Mines et des Ressources. Ces réunions seront tenues en collaboration avec la Chambre des mines du Yukon et celle des Territoires du Nord-Ouest.

## NANISIVIK MINES LIMITED

En vertu d'un accord signé par M. Jean Chrétien, ancien ministre des Affaires indiennes et du Nord et par M. C. Frank Agar, président de la Mineral Resources International, le gouvernement fédéral doit investir 16.7 millions de dollars dans l'ouverture d'une mine de plomb-zinc à l'extrémité septentrionale de l'île Baffin et obtiendra en retour, 18 pour cent des actions de la Nanisivik Mines Limited, nouvelle société établie à Calgary. La Nanisivik Mines doit mettre en valeur le gisement de plomb-zinc situé au détroit de Strathcona; ce sera la première exploitation minière de grande envergure du territoire canadien au nord du Cercle arctique. La mine renforcera l'économie de l'Arctique orientale et permettra d'offrir de nouveaux emplois aux Inuit qui habitent cette partie du Nord.

## TRAVAUX D'EXPLORATION

D'après les premiers rapports reçus des chantiers, l'été 1974 sera, paraît-il, l'un des plus chargés d'activité au cours des récentes années sur le territoire canadien, au Nord du 60<sup>e</sup>. Dans le Nord du Yukon, on s'est attaché à prospecter autour de Bonnet Plume Lake, de Goz Lake, de Pinguicula Lake, de Fairchild Lake, de Margaret Lake, de Hart Lake et à côté de la route de Dempster. Un peu plus au sud, les travaux d'exploration ont été effectués principalement dans les régions de Minto, du chaînon Dawson et d'Anvil-Vangorda.

Dans les Territoires du Nord-Ouest, une chasse générale aux nouvelles venues de minéraux s'est étendue des monts Mackenzie jusqu'au district de Keewatin et du Nord du 60<sup>e</sup> parallèle jusqu'aux îles du Grand Nord.

## PROGRAMME D'EXPLORATION MINIÈRE DANS LE NORD

Jusqu'à ce jour, vingt-trois demandes d'appréciation ont été présentées à la Sous-section des services d'exploration et de géologie; quinze venaient du Yukon et huit, des Territoires du Nord-Ouest. Les sociétés qui se proposent de demander une aide sont priées de discuter de leur programme avec le géologue en chef de chaque territoire, c'est-à-dire, M. D.B. Craig, au Yukon et M. R.W. Hornal, dans les T.N.-O.

HOPE BAY MINES LIMITED

La propriété comprend un gisement d'argent à très haute teneur, situé sur 121 concessions contiguës, à savoir les concessions RUS et VAN, qui se trouvent sur la terre ferme des T.N.-O., au sud du détroit de Melville. Elle s'étend d'Ida Point, au nord, jusqu'à Roberts' Lake, au sud, sur une distance de cinq milles et de Roberts' Bay, à l'ouest, jusqu'à Angimayor Sound, à l'est.

Deux galeries ont été percées sur la propriété, l'une à Ida Point et l'autre à Roberts' Lake. Il n'y avait pas de travaux en cours dans la galerie d'Ida Point. A la galerie de Roberts' Lake, on s'occupe actuellement de foncer des montages dans la zone de minerai, à partir du niveau de la galerie. Les installations de broyage sont terminées; la société attend l'approbation du bassin d'évacuation des résidus par la Commission des eaux, avant d'entamer les opérations de broyage.

OPEN FILE ANNOUNCEMENT

O.F. MINERAL INDUSTRY ACTIVITY REPORTS, NORTHERN CANADA.

Manuscript copies of the following Mineral Industry Reports are now available for examination at the offices of the Exploration and Geological Services Unit, Department of Indian and Northern Affairs in Whitehorse, Yellowknife, and Ottawa.

- a) Mineral Industry Report, 1969 and 1970, Volume 3,  
Northwest Territories, west of 104° West Longitude.
- b) Mineral Industry Report, 1971 and 1972, Volume 1,  
Yukon Territory.
- c) Mineral Industry Report, 1971 and 1972, Volume 2,  
Northwest Territories, east of 104° West Longitude.
- d) Mineral Industry Report, 1971 and 1972, Volume 3,  
Northwest Territories, west of 104° West Longitude.
- e) Mineral Industry Report, 1973, Volume 1, Yukon Territory.
- f) Mineral Industry Report, 1973, Volume 2, Northwest  
Territories.

OPEN FILE ANNOUNCEMENT

O.F. MINERAL INDUSTRY ACTIVITY REPORTS, NORTHERN CANADA.

Manuscript copies of the following Mineral Industry Reports are now available for examination at the offices of the Exploration and Geological Services Unit, Department of Indian and Northern Affairs in Whitehorse, Yellowknife, and Ottawa.

- a) Mineral Industry Report, 1969 and 1970, Volume 3,  
Northwest Territories, west of 104° West Longitude.
- b) Mineral Industry Report, 1971 and 1972, Volume 1,  
Yukon Territory.
- c) Mineral Industry Report, 1971 and 1972, Volume 2,  
Northwest Territories, east of 104° West Longitude.
- d) Mineral Industry Report, 1971 and 1972, Volume 3,  
Northwest Territories, west of 104° West Longitude.
- e) Mineral Industry Report, 1973, Volume 1, Yukon Territory.
- f) Mineral Industry Report, 1973, Volume 2, Northwest  
Territories.

DOSSIERS PUBLICS

Dossiers  
publics:

MINERAL INDUSTRY ACTIVITY REPORTS, NORTHERN CANADA

Il est désormais possible de consulter les manuscrits des rapports suivants de l'industrie minière, aux bureaux de la Sous-section des services d'exploration et de géologie, à Whitehorse, à Yellowknife et à Ottawa.

- a) Mineral Industry Report, 1969 and 1970, Volume 3,  
Northwest Territories, west of 104<sup>0</sup> West Longitude.
- b) Mineral Industry Report, 1971 and 1972, Volume 1,  
Yukon Territory.
- c) Mineral Industry Report, 1971 and 1972, Volume 2,  
Northwest Territories, east of 104<sup>0</sup> West Longitude.
- d) Mineral Industry Report, 1971 and 1972, Volume 3,  
Northwest Territories, west of 104<sup>0</sup> West Longitude.
- e) Mineral Industry Report, 1973, Volume 1, Yukon Territory.
- f) Mineral Industry Report, 1973, Volume 2, Northwest  
Territories.

GEOSCEINCE FORUMS

Geoscience forums will be held in Whitehorse on December 10, 1974 and in Yellowknife on the afternoon of December 12 and the morning of the 13, 1974. The forums are sponsored by the Northern Natural Resources and Environment Branch, Department of Indian and Northern Affairs and the Geological Survey of Canada, Department of Energy, Mines and Resources. These meetings will be held with the co-operation of the Yukon Chamber of Mines and the Northwest Territories Chamber of Mines.

OPEN FILE ANNOUNCEMENT

O.F. MINERAL INDUSTRY ACTIVITY REPORTS, NORTHERN CANADA.

Manuscript copies of the following Mineral Industry Reports are now available for examination at the offices of the Exploration and Geological Services Unit, Department of Indian and Northern Affairs in Whitehorse, Yellowknife, and Ottawa.

- a) Mineral Industry Report, 1969 and 1970, Volume 3,  
Northwest Territories, west of  $104^{\circ}$  West Longitude
- b) Mineral Industry Report, 1971 and 1972, Volume 1,  
Yukon Territory.
- c) Mineral Industry Report, 1971 and 1972, Volume 2,  
Northwest Territories, east of  $104^{\circ}$  West Longitude.
- d) Mineral Industry Report, 1971 and 1972, Volume 3,  
Northwest Territories, west of  $104^{\circ}$  West Longitude
- e) Mineral Industry Report, 1973, Volume 1, Yukon Territory.
- f) Mineral Industry Report, 1973, Volume 2, Northwest  
Territories.

DOSSIERS PUBLICS

Dossiers  
publics:

MINERAL INDUSTRY ACTIVITY REPORTS, NORTHERN CANADA

Il est désormais possible de consulter les manuscrits des rapports suivants de l'industrie minière, aux bureaux de la Sous-section des services d'exploration et de géologie, à Whitehorse, à Yellowknife et à Ottawa.

- a) Mineral Industry Report, 1969 and 1970, Volume 3,  
Northwest Territories, west of 104<sup>0</sup> West Longitude.
- b) Mineral Industry Report, 1971 and 1972, Volume 1,  
Yukon Territory.
- c) Mineral Industry Report, 1971 and 1972, Volume 2,  
Northwest Territories, east of 104<sup>0</sup> West Longitude.
- d) Mineral Industry Report, 1971 and 1972, Volume 3,  
Northwest Territories, west of 104<sup>0</sup> West Longitude.
- e) Mineral Industry Report, 1973, Volume 1, Yukon Territory.
- f) Mineral Industry Report, 1973, Volume 2, Northwest  
Territories.

GEOSCIENCE FORUMS

Geoscience forums will be held in Whitehorse on December 10, 1974 and in Yellowknife on the afternoon of December 12 and the morning of the 13, 1974. The forums are sponsored by the Northern Natural Resources and Environment Branch, Department of Indian and Northern Affairs and the Geological Survey of Canada, Department of Energy, Mines and Resources. These meetings will be held with the co-operation of the Yukon Chamber of Mines and the Northwest Territories Chamber of Mines.

**NORTHERN MINING HIGHLIGHTS**

**NOUVELLES SUR LES MINES  
DU NORD**

Working quietly on a base metal prospect in the Northwest Territories 250 miles northwest of Churchill, Manitoba, Gemex Minerals appears to have made a significant copper-zinc, lead-silver-gold discovery. The initial drill hole put down to test a Turam anomaly has intersected a zone of heavy mineralization 34.5 feet wide (from 137-171.5 feet) that averages 2.9 per cent copper, 6.84 zinc, 0.49 per cent lead, 3.09 oz. silver and 0.034 oz. gold per ton.

An agreement has recently been signed with Tricentrol Canada for exploration of the 500 claims in the Summit Lake area of the Northwest Territories controlled by Perry River Nickel Mines. Several lead-zinc showings occur on the claims, the largest covering an area of 1,600 feet by 300 feet. A prospecting team has been working on the property and a drill was mobilized for an early start on the diamond drill program.

Vieco Resources is participating to the extent of a two-thirds interest in a joint venture with Whipsaw Resources on a 103-claim property in the Flat River District, 100 miles north of Watson Lake, Yukon Territory. A program consisting of mapping, sampling and 2,000 feet of diamond drilling is to be carried out.

Consolidated Shunsby Mines has entered into an option agreement with Shell Canada for exploration and development of its uranium property east of Yellowknife, Northwest Territories. Trenches and pits on the property and recent geological and radiometric surveys carried out by Consolidated Shunsby have revealed appreciable areas of abnormal uranium radioactivity, while random sampling of the pitchblende mineralization has been encouraging.

Excellent results have been obtained in the drilling by Cominco in 1974 on the Bathurst Norsemines new Boot Lake zone, Hackett River property, Northwest Territories, Bathurst President Paul Frigstad advises. The new zone is about 3,300 feet east of the Cleaver Lake zone, which was partially explored in 1973.

Conwest Exploration Company and Brascan Resources appear to have come up with a significant base metals-silver discovery near Beechy Lake south of the Bathurst Norsemynes property in the Bathurst Inlet area, N.W.T. Known as the Yava group, it consists of 160 claims. The assays of the discovery of zinc, lead, copper, silver and gold were carried out by the Yellowknife Assay Office of the Department of Indian and Northern Affairs.

An underground heading below the 5th level at Terra Mining and Exploration's Camsell River area silver mine, 27 miles south of Port Radium, N.W.T. has encountered a rich new vein that President Alvin Harter describes as the most significant discovery in the company's brief history. Called No. 11 vein, it has now been drifted for a length of 120 feet with a weighted average of the first eight rounds of 250.4 oz. of silver across 8.7 feet. The heading is still advancing in visible native silver, the company reports.

Chimo Gold Mines of the Conwest Group has acquired a new property in the Yukon, the MacMillan Project, which is composed of a contiguous group of 1,070 claims recently staked to cover geology on strike from the Anvil/Van Gorda lead-zinc-silver deposits.

Leisure Gold, formerly Leisure Developments, plans to raise \$60,000 through a best efforts offering of shares to defray administrative expenses and to continue operations on the placer Klondike project in the Yukon. Work started on the properties in July this year. On the Dominion Creek property 26,995 cu. yd. of gravel have been sluiced with total crude gold recovery of 588.25 oz. At Eureka Creek, 44,800 cu. yd. of gravel have been sluiced for recovery of 398 oz. of crude gold.

Water use authorizations have been issued to 100 placer mining operations in the Yukon Territory under Section 15(1) of the Northern Inland Water Act by the Yukon Territory Board.

Hudson Bay Mining and Smelting (Hudbay) and its affiliated Anglo American Corp. of Canada (Amcan) have increased their holdings in Whitehorse Copper to more than 40 per cent through purchase of 349,100 shares of Whitehorse at \$2.50 per share. Their combined holdings are now 1,369,330 shares.

A major mining operation is predicted for the zinc-lead-silver discovery in the Vangorda Creek area of the Yukon, owned 60 percent by Kerr Addison Mines and 40 percent by AEX Minerals. President Aaro E. Aho sees the discovery as a new prospective for underground mining and for much deeper drilling in the district and is confident there will be a new surge of exploration.

La Consolidated Shunsby Mines a conclu un accord en vue de prospecter et d'exploiter la concession d'uranium de la Shell Canada située à l'est de Yellowknife (Territoires du Nord-Ouest). Les tranchées et les fosses creusées sur la concession, de même que les récents levés géologiques et radiométriques effectués par la Consolidated Shunsby, ont révélé qu'il existait des zones appréciables de radioactivité anormale caractéristiques de l'uranium, tandis que l'échantillonnage fortuit de pechblende a donné des résultats encourageants.

Le président de la Bathurst, M. Paul Frigstad, a révélé que d'excellents résultats ont été obtenus grâce aux forages effectués par la Cominco en 1974 dans la nouvelle zone de Boot Lake de la Bathurst Mines, sur la propriété Hackett River, dans les Territoires du Nord-Ouest. La nouvelle zone se trouve à environ 3,300 pieds à l'est de la zone Cleaver Lake, qui a été partiellement explorée en 1973.

## Nouvelles des mines du Nord

Tout en procédant tranquillement à l'extraction des métaux communs sur une concession située dans les Territoires du Nord-Ouest, à 250 milles au nord-ouest de Churchill (Manitoba), la Gemex Minerals semble avoir fait une importante découverte de cuivre-zinc-plomb-argent-or. Le premier sondage effectué en vue de tester une anomalie par la méthode Turam a traversé un important gisement de minerai d'une largeur de 34.5 pieds (de 137 à 171.5 pieds) dont les teneurs moyennes sont: 2.9 pour cent de cuivre, 6.84 de zinc, 0.49 de plomb, ainsi que 3.09 onces d'argent et 0.034 once d'or par tonne.

Un accord a été récemment conclu avec la Tricentrol Canada en vue de prospecter, dans la région du lac Summit, 500 concessions contrôlées par la Perry River Nickel Mines. On y trouve plusieurs venues de plomb-zinc, dont la plus grande englobe une zone de 1,600 pieds sur 300. Une équipe de prospecteurs travaille sur la propriété et une tour a été mobilisée en vue de commencer rapidement les travaux de forage au diamant.

De concert avec la Whipsaw Resources, la Vieco Resources participe à un consortium dont elle détient les deux tiers des actions; la propriété comprend 103 concessions situées dans le district de Flat River, à 100 milles au nord de Watson Lake (Yukon). Les travaux à effectuer comprennent la cartographie, l'échantillonnage et 2,000 pieds de forages au diamant.

La Conwest Exploration Company et la Brascan Resources semblent avoir fait une importante découverte de métaux communs et d'argent près de Beechy Lake, au sud de la propriété de la Bathurst Norsemines, dans la région de l'inlet Bathurst (T.N.-O.). Le gisement dénommé groupe Yava comprend 160 concessions. Les essais des échantillons de zinc, de plomb, de cuivre, d'argent et d'or ont été effectués par le Bureau des essais installé à Yellowknife par le ministère des Affaires indiennes et du Nord.

Une galerie souterraine percée en-dessous du 5e niveau de la mine d'argent que possède la Terra Mining and Exploration dans la région de Camsell River, à 27 milles au sud de Port Radium (T.N.-O.), a traversé une nouvelle veine très riche, qui selon le président, M. Alvin Harter, constitue la plus importante découverte faite par la société au cours de sa brève existence. Dénommée Veine n° 11, elle a déjà été traversée sur une longueur de 120 pieds; les huit premières volées ont accusé une moyenne pondérée de 250.4 onces d'argent sur 8.7 pieds. La société a annoncé que la galerie avance encore et traverse de l'argent naturel visible.

La Chimo Gold Mines, du Conwest Group, a acheté au Yukon, une nouvelle propriété, le MacMillan Project, qui comprend un groupe de 1,070 concessions contiguës récemment jalonnées en vue de l'étude géologique sur une direction partant des gisements de plomb-zinc-argent de l'Anvil/Van Gorda.

La Leisure Gold, ci-devant Leisure Developments, se propose de réunir \$60,000 grâce à une vente d'actions au plus offrant, afin de payer les frais d'administration et de poursuivre les travaux sur l'exploitation de placers Klondike, au Yukon. Les travaux ont commencé sur les propriétés en juillet de cette année. Sur la propriété Dominion Creek, le tamisage de 26,995 verges cubes de gravier a permis de récupérer 588.25 onces d'or brut. À Eureka Creek, il a fallu tamiser 44,800 verges cubes de gravier pour récupérer 398 onces d'or brut.

Des permis d'utilisation de l'eau ont été délivrés à 100 exploitations de placers du Yukon en vertu de l'article 15 (1) de la Loi sur les eaux intérieures du Nord, par la Commission du Yukon.

Après avoir acheté 349,100 actions de la Whitehorse Copper à \$2.50 chacune, l'Hudson Bay Mining and Smelting et sa filiale, l'Anglo American Corp. of Canada (Amcan) possèdent désormais plus de 40 pour cent des actions de la Whitehorse. Pour le moment, elles détiennent en tout 1,369,330 actions.

Une importante exploitation minière est prévue à la suite de la découverte de zinc-plomb-argent faite dans la zone Vangorda Creek (Yukon) qui appartient à 60 pour cent à la Kerr Addison Mines et à 40 pour cent à l'AEX Minerals. Le président, M. Aaro E. Aho, pense que la découverte ouvrira la voie à une exploitation souterraine et à des forages plus profonds dans le district; il pense aussi qu'il y aura une nouvelle vague de prospection.

Shell Canada has been granted the exclusive option to negotiate an agreement on Redstone's Coates Lake Mineral lease until December, 1974. Redstone received \$20,000 from Shell as consideration for this option. The Coates Lake lease is located in the Northwest Territories about 70 miles north-east of Canada Tungsten's producing mine and about 90 miles west of the proposed Mackenzie Valley pipeline route. Previous drilling on this lease indicated the possibility of developing a substantial tonnage of copper ore in a sedimentary formation.

La société Redstone Coates Lake Mineral a accordé jusqu'au mois de décembre 1974 à la Shell Canada une option exclusive de négociation d'un accord sur la mise en valeur de sa concession. La société Shell a versé \$10, 000 à la Redstone au titre de cette option. La concession de Coates Lake est située dans les Territoires du Nord-Ouest, à environ 70 milles au nord-est d'une mine exploitée par la société Canada Tungsten et à environ 90 milles à l'ouest du projet de tracé du pipeline de la vallée du Mackenzie. Les sondages déjà effectués sur cette concession ont indiqué l'existence d'une formation sédimentaire susceptible de fournir un tonnage substantiel de minerai de cuivre.

Yellowknife Notes

The Resident Geologists office in Yellowknife lost the services of J.D. (Jim) Murphy, Nahanni District Geologist in September who is returning to Queens University for post graduate training. Dr. Walter Gibbins has been appointed acting Nahanni District Geologist.

Pierre Laporte, the Keewatin District Geologist has returned to Brock University to complete his M.Sc. Mr. Laporte's thesis topic is the Geology of the Rankin Inlet area.

Dr. Walter Gibbins and Jim Seaton both gave talks to the Western meeting of the Canadian Institute of Sedimentary and Petroleum Geology.

### Nouvelles de Yellowknife

Le bureau des géologues de Yellowknife a perdu en septembre les services de M. J.D. Murphy, géologue du district de Nahanni, qui est retourné à l'Université Queens pour poursuivre des études. M. Walter Gibbins a été nommé géologue intérimaire du district de Nahanni.

M. Pierre Laporte, géologue du district de Keewatin, est retourné à l'Université Brock pour y compléter sa maîtrise en sciences. Sa thèse porte sur la géologie de la région de Rankin Inlet.

MM. Walter Gibbins et Jim Seaton ont prononcé des causeries à la réunion, tenue dans l'Ouest, de l'Institut canadien de géologie sédimentaire et pétrolière (Canadian Institute of Sedimentary and Petroleum Geology).

Government/Industry Geoscience Forums  
to be held in Whitehorse and Yellowknife

Two government/industry geoscience forums will be held in December in Whitehorse, Yukon Territory, and Yellowknife, Northwest Territories, under the joint sponsorship of the Geological Survey of Canada of the Department of Energy, Mines and Resources, the Northern Natural Resources and Environment Branch of the Department of Indian and Northern Affairs, and the Yukon and Northwest Territories Chambers of Mines.

The attendance at the first forums, held in the Territories in December 1973 encouraged the sponsoring bodies to repeat the program this year. The purpose of the forums is to bring together those government geologists who worked in the North this past summer and industry representatives interested in northern mineral exploration. It is hoped the forums will provide industry representatives with an opportunity to review government programs in the geoscience field and to suggest changes or new areas of study of value to northern mining exploration.

The Whitehorse forum will be held on December 10 and 11 and the following will be among the speakers: D.J. McLaren, R.B. Campbell, D.J. Tempelman-Kluit, K.M. Dawson, D.K. Norris, H. Gabrielse, Geological Survey of Canada, and B. Trevor, D.B. Craig, R.W. Hornal and W.D. Sinclair of the Department of Indian and Northern Affairs. In addition to these government speakers, industry representatives will give short informal talks on geologically interesting topics such as "On-Property" Exploration and "Outside" Exploration. Proceedings will start at 9 a.m.,

Dec. 10 and finish 12 noon Dec. 11. Those who are interested in attending are asked to contact Cam Oglivy, manager of the Yukon Chamber of Mines, Whitehorse, who is looking after administrative arrangements there.

On the afternoon of December 12 and morning of December 13, a similar forum will be held in Yellowknife. Speakers will include, J.O. Wheeler, D.K. Norris, K.M. Dawson, J.B. Henderson, C.C. Durham, E.M. Cameron, P.F. Hoffman, M. Schau, all of the Geological Survey of Canada, and R.W. Hornal, W.J. Crawford, W.A. Padgham, G.R. Jackson and I. Nichol representing the Department of Indian and Northern Affairs. Those interested in attending this forum are asked to contact Mrs. Ester Braden, manager of the Northwest Territories Chamber of Mines, Yellowknife, who is looking after administrative details there.

On December 10 the Local Branch of the C.I.M.M. in Whitehorse has arranged a dinner and on December 12 the Northwest Territories Chamber of Mines will hold its annual dinner meeting.

Delegates to the geoscience forums are expected to make their own travel and accommodation arrangements.

Débats géoscientifiques organisés par le gouvernement  
et par l'industrie à Whitehorse et à Yellowknife

Deux débats géoscientifiques organisés par le gouvernement et par l'industrie se tiendront en décembre à Whitehorse (Yukon) et à Yellowknife (Territoires du Nord-Ouest), sous le patronage conjoint de la Commission géologique du Canada (ministère de l'Energie, des Mines et des Ressources), de la Direction des ressources naturelles et de l'environnement du Nord (ministère des Affaires indiennes et du Nord) et des Chambres des mines du Yukon et des Territoires du Nord-Ouest.

L'auditoire a été si important lors des premiers débats tenus dans les Territoires en décembre 1973, que les organisateurs ont jugé bon de reprendre le programme cette année. Les débats ont pour but de réunir les géologues du gouvernement qui ont travaillé dans le Nord au cours de l'été dernier et les représentants de l'industrie qui s'intéressent à l'exploration minière dans le Nord. Il faut espérer que ces derniers auront ainsi l'occasion d'examiner les travaux effectués par le gouvernement dans le domaine géoscientifique et de proposer les modifications ou les nouvelles études qui revêtent une certaine importance pour l'exploration minière dans le Nord.

Au cours des débats qui se tiendront à Whitehorse les 10 et 11 décembre, les conférenciers suivants prendront la parole: D.J. McLaren, R.B. Campbell, D.J. Tempelman-Kluit, K.M. Dawson, D.K. Norris, H. Gabrielse, de la Commission géologique du Canada et B. Trevor, D.B. Craig, R.W. Hornal et W.D. Sinclair, du ministère des Affaires indiennes et du Nord. En plus de ces fonctionnaires, certains représentants de l'industrie diront quelques mots sur des questions géologiques pertinentes, comme par exemple, la prospection "sur les concessions" et à "l'extérieur". Les séances commenceront

le 10 décembre à 9 heures pour se terminer le 11 décembre à midi. Les personnes qui désirent y assister sont priées d'entrer en contact avec M. Cam Ogilvy, administrateur de la Chambre des mines du Yukon, à Whitehorse, qui s'occupe des formalités administratives.

Des débats identiques se tiendront à Yellowknife pendant l'après-midi du 12 décembre et la matinée du 13 décembre. Parmi les conférenciers, il faut citer: J.O. Wheeler, D.K. Norris, K.M. Dawson, J.B. Henderson, C.C. Durham, E.M. Cameron, P.F. Hoffman, M. Schau, de la Commission géologique du Canada et R.W. Hornal, W.J. Crawford, W.A. Padgha,, G.R. Jackson et I. Nichol, représentant le ministère des Affaires indiennes et du Nord. Les personnes qui désirent assister à ces débats sont priées d'entrer en contact avec Mme Ester Braden, administratrice de la Chambre des mines des Territoires du Nord-Ouest, qui s'occupe des formalités administratives.

La succursale locale de la C.I.M.M. à Whitehorse organisera un dîner le 10 décembre. La Chambre des mines des Territoires du Nord-Ouest tiendra son dîner annuel le 12 décembre.

Les délégués aux débats géoscientifiques devront s'occuper eux-mêmes de leur voyage et de leur hébergement.

Open File Announcements

Mineral Industry Report, 1971-72, Volume 2 of 3, Northwest Territories east of 104° west longitude, EGS 1974-2, by P.J. Laporte, 1974, 88 p. Price \$2.00.

This report, issued by the Department of Indian and Northern Affairs, is of interest to users of Geological Survey publications and is available from the following offices of Indian and Northern Affairs:

Mining Section, Northern Natural Resources and Environment Branch, Indian and Northern Affairs, 400 Laurier Avenue West, Ottawa, Ontario K1A 0H4.

Resident Geologist , Indian and Northern Affairs (1) Box 1500, Yellowknife, N.W.T. XOE 1H0, and (2) Building 200, Takhini, Whitehorse, Yukon Y1A 3V1.

BOOMING YUKON STAKES MORE CLAIMS THAN B.C. FOR THE FIRST TIME IN HISTORY

Vancouver -

For the first time in modern history claim staking in the Yukon has exceeded that in British Columbia.

The number of claims staked in the Yukon in the first nine months this year, according to a survey by the British Columbia & Yukon Chamber of Mines, was 12,450, up from 7,889 in the corresponding period of 1973. In B.C. the number for the period was 10,643, down from 24,672 in the 1973 period.

The chamber also reports estimated exploration expenditures in B.C. for 1974 at \$19.4 million against \$27.7 million in 1973 and \$38 million in 1972. In the Yukon exploration expenditures this year are estimated at \$11.9 million, against \$7.2 million in 1973 and \$4 million in 1972.

Comments from all those surveyed, the chamber reports, clearly established that the reason for the continued decline in B.C. prospecting, exploration and claim staking is the Mineral Royalties Act, Bill 31, which followed other adverse legislation.

A serious loss, the chamber said, is the technical and professional prospecting expertise being forced to move to other countries. At this time, individual prospectors, mining consultants and small companies are bearing the brunt of the recession in exploration.

With higher metal prices and strong markets that prevailed in 1973 and the first part of 1974, exploration should have been at a record level in B.C., similar to the boom the Yukon is enjoying, the chamber said.

## Open File Announcement

### O.F. -- Base Metal Deposits, Slave Geological Province

Geological maps at a scale of 1" - 200' of the High Lake copper-zinc deposit (76 M/7) and of the Indian Mountain Lake zinc-lead-silver-copper deposit (75 M/2) have been prepared by W. L. Johnson of the University of Western Ontario for the Department of Indian and Northern Affairs. Brief descriptive notes accompany the maps.

This open file can be viewed in the libraries of the Geological Survey of Canada and in the offices of the Resident Geologist, Indian and Northern Affairs, in Whitehorse, Yellowknife and Ottawa.

Copies may be obtained by application to the Resident Geologist, Box 1500, Yellowknife, Northwest Territories, XOE 1H0.

Price: \$4.00

Vancouver-

Pour la première fois dans l'histoire, il s'est jalonne plus de claims au Yukon qu'en Colombie-Britannique.

Selon une enquête de la British Columbia & Yukon Chamber of Mines, les prospecteurs ont jalonné, pendant les neuf premiers mois de l'année, 12,450 claims au Yukon, contre 7,889 pour la période correspondante 1973. En Colombie-Britannique, ils n'en ont jalonné que 10,643, comparativement à 24,672 au cours de la même période en 1973.

La Chambre signale aussi que les dépenses estimatives d'exploration en Colombie-Britannique s'établissent à 19.4 millions de dollars pour 1974, contre 27.7 millions en 1973 et 38 millions en 1972. Au Yukon, ces dépenses atteindraient 11.9 millions de dollars cette année, contre 7.2 millions en 1973 et 4 millions en 1972.

Les commentaires obtenus de tous les répondants indiquent clairement que le déclin de la prospection de l'exploration et du jalonnement en Colombie-Britannique résulte de l'entrée en vigueur de la Mineral Royalties Act (Bill 31) à la suite d'autres lois défavorables.

La Chambre fait remarquer que l'exode inévitable des compétences techniques et professionnelles vers d'autres pays constitue une perte sérieuse. Ce sont les prospecteurs, les experts-conseils et les petites sociétés minières qui souffrent le plus du ralentissement de l'exploration.

Par suite des prix accrus des métaux et de la fermeté des marchés en 1973 et au début de 1974, l'exploration aurait dû atteindre, en Colombie-Britannique, un niveau record, semblable à l'emballement qu'a connu le Yukon, de dire la Chambre.

## Dossier courant

D.C. - Gisements de métaux communs, province géologique des Esclaves

M. W.L. Johnson, de l'Université Western Ontario, a préparé à l'intention du ministère des Affaires indiennes et du Nord canadien des cartes géologiques à l'échelle de 1" - 200' du gisement de cuivre et de zinc du lac High (76M/7) et du gisement de plomb, d'argent et de cuivre du lac Indian Mountain (75M/2). De courtes descriptions accompagnent ces cartes.

Le dossier courant peut être consulté dans les bibliothèques de la Commission géologique du Canada et dans les bureaux du géologue en poste, ministère des Affaires indiennes et du Nord canadien, à Whitehorse, Yellowknife et Ottawa.

On peut en obtenir des exemplaires en s'adressant au géologue en poste, C.P. 1500, Yellowknife (T.N.-O.), XOE 1H0.

Prix: \$4

Note: These items of interest published under the title  
Northern Mining Highlights are taken from the Northern  
Miner and other mining publications and are not necessarily  
the views of this Department.

Nota: Ces articles d'intérêt publiés sous le titre de Northern Mining  
Highlights sont tirés de l'hebdomadaire Northern Miner et d'autres  
publications traitant des mines et ne reflètent pas nécessairement  
l'opinion du Ministère.

Preliminary Report on Mining Activities  
in the Northwest Territories  
January to October, 1974.  
by M.L. Brown

## Mining Activities in the Northwest Territories

January to October, 1974

### Plant Yellowknife Mines Ltd.

Tonnage and grade are both well below 1973. The open pit near the south end of the property, is now producing ore at the rate of 400 tons per day. This zone contains half a million tons of ore grading 0.3 oz/ton to a depth of 350 feet. Waste stripping began in March and ore was first produced in August.

A new wage contract was signed in September, calling for a 27% increase. This may reduce labour turnover and improve the quality and quantity of underground miners. The shortage of experience stope miners has been responsible for a substantial reduction in underground ore production.

### Con Mine of Cominco Ltd.

Tonnage is down, but grade is up from 1973. Labour shortage and turnover are responsible for the reduction in tonnage. A recent substantial increase in wages may improve this situation.

The new Robertson shaft is at 2400 feet. Target date for completion at 5800 feet is early in 1976. The shaft went through a quartz vein at 1600 feet that contained some gold values. A station was cut at 2300 to expedite the investigation of this zone.

Con mine won the Ryan Trophy from the C.I.M.M. for 1973, for the safest mine in the Prairie Provinces and N.W.T.

### Line Point Mines Ltd.

Tonnage is up from last year, but grade is down, giving nearly the same production. Ore is coming from about nine pits, and the average hauling distance is increasing. This calls for more and larger equipment and a bigger crew. They are recruiting some women as heavy haulage equipment drivers, which has helped to solve their manpower problems.

The M-40 orebody is being worked from underground. Plans are underway to increase the flow of ore from this and other deep orebodies. This will result in more equipment, more employees and an increase in the size of the townsite.

### Sho Bay Mines Ltd.

The mine has run out of ore. For the first 10 months of 1974, the mine averaged 10 tons per day grading over 100 ounces of silver per ton, giving a total of more than 1 million ounces. The mill closed in August. One stope is being mined above the adit

level.

The company has moved its hoist back to the old Eldorado mine and are proceeding to dewater it to the 850 level. This will be followed by an exploration and development program to mine the silver in these workings. The water is contaminated with arsenic and radioactivity and must be treated chemically on surface.

#### Terra Mining and Exploration Ltd.

Tonnage is up from 1973, but grade and silver production are down. Grade has been improving as the richer ore from the No. 10 vein gets into the mill.

The new veins are giving the mine some ore reserves for the first time since start-up. They are confident that they can trace them continuously from the fifth level to surface.

Some work was done on the adit at Norex, but little progress was made before freeze-up. No ore was encountered. Labour problems have hampered production, and management continuity has been a problem.

#### Cantung Mine of Canada Tungsten Mining Corporation Ltd.

The open-pit shut down for good in the fall of 1973, and by May the ore from the open pit had been completely milled. Underground ore is easier to mill, and of better grade, so there was no loss of production by switching to underground production.

Canadian Mine Services did the underground development work on contract, which is now complete. The mine is in the process of taking over production. There are many mechanical problems yet to be solved, mainly due to slow delivery of machines and equipment.

They are busy with a program of improvement and expansion to the townsite, plant and mill. Shortage of labour has hampered this effort, and the program is behind schedule.

#### Hope Bay Mines Ltd.

Crews moved in during June, rehabilitated the mine and built a small mill. Mining proceeded on the high grade vein that was opened up last year. The mill operated at 14 tons per day during August and closed in September. They reported 65,000 oz. of silver produced from 850 tons milled.

#### WT Property of Precambrian Shield Resources Ltd.

Some 400 feet of underground exploration work was done on a gold showing about 40 miles northeast of Yellowknife during April and May. Diamond drilling

continued until August. The work identified a mineralized zone containing 600 tons per vertical foot grading .16 ounces per ton gold.

#### Arvik Mines

Diamond drilling continued through the summer at the mine and some neighbouring areas. Economic feasibility studies are underway.

#### Camlaren Mine

The Camlaren shaft on Gordon Lake was deepened from 380 feet to 840 feet during August and September. Drifting is continuing on the bottom level in the ore zone. Some gold values have been rumoured.

#### Nanisivik Mine

Work has started on the mill foundation and a crew is on the property to start an 8,000 foot underground development program. The Federal Government has taken a minority share position in the company.

#### Silver Bay

Northrim Mines Ltd. has a crew on the old Federated silver property on Camsell River. They are rehabilitating the mill and camp. Plans are to drive a decline on the existing vein structure to provide 400 feet of backs below the silver ore which was mined 2 years ago.

## GEOSCIENCE FORUMS - WHITEHORSE AND YELLOWKNIFE

Two government-industry geoscience forums held in December in Whitehorse and Yellowknife were well attended by exploration geologists, territorial prospectors and local business men. Registration at Whitehorse was 152 and at Yellowknife 144, with 71 companies directly concerned with mining and mining exploration and 15 mining service companies being represented by one or more delegates. The remainder of those attending were local prospectors and geologists from the Geological Survey of Canada and the Department of Indian and Northern Affairs.

The forums were organized under the joint sponsorship of the Geological Survey of Canada of the Department of Energy, Mines and Resources, the Northern Natural Resources and Environment Branch of the Department of Indian and Northern Affairs and the Yukon and Northwest Territories Chambers of Mines.

1 Northern Exploration Highlights were presented by resident geologists at the geoscience forums as follows:

#### Yukon 1974

Exploration activity directed towards the discovery and evaluation of mineral deposits, exclusive of petroleum exploration, resulted in the expenditure of some \$12 million. The amount of work was greater than in previous years although not in direct proportion to expenditures, as a large proportion of 1974 exploration was in less readily accessible parts of the Territory with attendant high logistic costs. Some of the bases which led to the activity are as follows:

- (1) Attractive discoveries were made in the Yukon and immediately adjacent parts of MacKenzie District during 1972 and 1973.
- (2) Base metal prices, particularly for zinc, have been such that production could well be profitable in isolated deposits lacking significant amounts of high unit value metals.
- (3) Exploration inhibiting legislation and policies elsewhere have stimulated certain exploration efforts in the Yukon.

### N.W.T. 1974

The year 1974 has been a banner year for mineral exploration in the Northwest Territories. Some \$18,000,000 is estimated to have been spent on exploration during the year. These funds have been divided between the search for base metals, the search for uranium and the examination of gold and silver properties in the Territories. By December 1, 1974, some 11,500 claims had been staked and 39 new prospecting permits issued, to bring the total claims in good standing to 49,000 and the number of prospecting permits in good standing to 67. At this time there seems to be little doubt that 1975 will be an even busier year for mineral exploration crews in the Northwest Territories.

The most promising developments include:

- 1) The discovery of a third "ore" zone, the "Boot Lake Zone", on the Bathurst Norsemynes Ltd. property on the Hackett River by Cominco Ltd.
- 2) The drilling by the Yava Syndicate (Conwest Exploration Co. Ltd. and Brascan Resources Ltd.) of a lead-zinc body thirty miles south of Hackett River at H Lake. This body lies in acid volcanics on the opposite limb of the syncline from the Bathurst Norsemynes Ltd. property and, therefore, indicates a considerable extent of favourable rock.
- 3) The discovery by Texasgulf Inc. of a copper deposit east of Takiyuak Lake. This body was cut by five drill holes with an average intersection of 34 feet assaying 4.47% copper, 1.3 ounces silver and 4.83% zinc with minor lead and gold.

- 4) The discovery by Rio Tinto Canadian Exploration Ltd., Serem Ltd. and Welcome North Mines Ltd. of long mineralized horizons within Lower Paleozoic formations (mainly the Sekwi Formation) north and east of the Bonnet Plume discovery of Barrier Reef. This discovery has led to much staking in the headwaters of the Arctic Red River and the Gayna River.
- 5) The discovery, by drilling, by Gemex Minerals Ltd. of a copper-zinc body at Heninga Lake in the Keewatin District. This body has recently been optioned to St. Joseph Explorations Ltd. and additional drilling is planned. Many other interesting properties are in the preliminary stages of evaluation.

During the forthcoming Forty-third Annual Prospectors and Developers Convention in Toronto during March, D.B. Craig and Mr. R.W. Hornal, resident geologists, will each present a paper reviewing the 1974 mining exploration activity for the Yukon and N.W.T. respectively. Persons who are interested in the mining industry in Northern Canada may wish to attend these presentations and visit our information display in the Ontario room.

Rapport préliminaire sur l'activité minière  
dans les Territoires du Nord-Ouest  
de janvier à octobre 1974

M.L. Brown

## Activité minière dans les Territoires du Nord-Ouest

de janvier à octobre 1974

### Giant Yellowknife Mines Ltd.

Les chiffres du tonnage et de la teneur du minerai sont très inférieurs à ceux de 1973. La mine à ciel ouvert située près de l'extrémité sud de la concession produit actuellement du minerai à un rythme de 400 tonnes par jour. Cette zone renferme, à une profondeur de 350 pieds, un demi-million de tonnes de minerai d'une teneur de 0.3 once par tonne. On a entrepris l'enlèvement des terrains de couverture et la production de minerai a débuté en août.

Un nouveau contrat de salaires, signé en septembre, prévoit une augmentation de 27%. Cette hausse peut diminuer le taux de fluctuation de la main-d'oeuvre et augmenter la qualité et la quantité des mineurs qui travaillent dans les mines souterraines. La baisse appréciable de la production des gisements souterrains est attribuable à la pénurie de mineurs d'expérience dans l'excavation minière.

### Con Mine of Cominco Ltd.

Comparativement à 1973, le tonnage a connu une baisse, tandis que la teneur du minerai était plus élevée. La fluctuation et la pénurie de main-d'oeuvre sont les principales causes de la diminution du nombre de tonnes. Une augmentation récente assez importante des salaires peut améliorer la situation.

Le nouveau puits Robertson a été creusé jusqu'à une profondeur de 2,400 pieds. On prévoit que, au commencement de 1976, on devrait avoir terminé les travaux nécessaires pour atteindre 5,800 pieds. Ce puits a, à 1,600 pieds, traversé une veine de quartz qui avait une certaine teneur en or. On a aménagé une recette à 2,300 pieds afin d'étudier cette zone.

La mine Con a remporté le trophée Ryan, décerné par l'I.C.M.M., à titre de mine qui était la plus sûre dans les provinces des Prairies et dans les Territoires du Nord-Ouest en 1973.

Pine Point Mines Ltd.

Par rapport à l'année dernière, le tonnage a été supérieur, mais la teneur a connu une baisse; par conséquent, la production a été sensiblement la même. Le minerai provient d'environ neuf puits et la distance moyenne de transport augmente. Cette situation exige plus de machinerie lourde de transport et une équipe plus nombreuse. En engageant des femmes comme opératrices de machinerie lourde de transport, on a résolu en partie les problèmes de main-d'oeuvre.

Le gisement M-40 est exploité de façon souterraine et on élabore des plans afin d'accroître la production de minerai de ce gisement et d'autres filons en cours. Il y aura donc augmentation de la machinerie, du nombre d'employés et de la superficie de l'emplacement urbain.

Cho Bay Mines Ltd.

Le minerai de la mine s'est épuisé. Pendant les 10 premiers mois de 1974, on a extrait, en moyenne, 90 tonnes par jour de minerai d'une teneur de 100 onces d'argent par tonne, soit un total de plus de 2 millions d'onces. Le moulin fermé en août. On a pratiqué une excavation minière au-dessus de la galerie à flanc de coteau.

La société a déménagé ses installations d'extraction à l'ancienne mine Eldorado et a entrepris de la dessécher jusqu'à une profondeur de 850 pieds. Ces travaux seront suivis d'un programme de prospection et d'exploitation afin d'extraire l'argent contenu dans ces gisements. L'eau contient de l'arsenic et de la radioactivité et doit être traitée en surface.

#### Terra Mining and Exploration Ltd.

Comparativement à 1973, le tonnage était supérieur, mais la teneur et la production d'argent étaient moins élevées. La teneur s'est améliorée grâce à l'arrivée au moulin du minerai plus riche du filon n° 10.

Les nouveaux filons apportent à la mine certaines réserves de minerai pour la première fois depuis le commencement de l'exploitation. On espère pouvoir les suivre au tracé de façon continue à partir du cinquième niveau jusqu'à la surface.

Certains travaux ont été exécutés à la galerie à flanc de coteau de la mine Norex, mais on n'a fait que peu de progrès avant le gel. On n'a trouvé aucun gisement. Les difficultés de main-d'oeuvre ont ralenti la production et il a été difficile d'assurer la permanence sur la plan administratif.

#### Cantung Mine of Canada Tungsten Mining Corporation Ltd.

La mine à ciel ouvert a fermé définitivement à l'automne 1973 et, en mai, on avait terminé de broyer le minerai provenant de cette mine. Le minerai de gisement souterrain est plus facile à broyer et présente une meilleure teneur; par conséquent, en adoptant l'exploitation de gisements souterrains, cette société n'a pas connu de baisse de la production.

Les travaux d'aménagement souterrain ont été exécutés par les Canadian Mine Services, aux termes d'un contrat, et sont maintenant terminés. La mine devrait assurer bientôt la production. Il y a encore de nombreux problèmes mécaniques à résoudre, causés principalement par la lenteur de livraison de l'outillage et de la machinerie.

On s'occupe actuellement d'un programme d'amélioration et d'agrandissement de l'emplacement, de l'usine et du moulin. La pénurie de main-d'oeuvre a freiné cet effort et le programme connaît un retard.

#### Hope Bay Mines Ltd.

Des équipes, venues s'installer au mois de juin, ont rouvert la mine et construit un petit moulin. L'activité minière a porté sur un filon de forte teneur découvert l'an passé. Le moulin qui produisait 14 tonnes par jour au mois d'août, a fermé ses portes en septembre. On signale que les 850 tonnes de minerai broyé ont produit 65,000 onces d'argent.

#### Concession WT de la Precambrian Shield Resources Ltd.

Au cours des mois d'avril et de mai, on a exécuté environ 400 pieds de travaux de prospection souterraine d'un affleurement aurifère situé à 40 milles au nord-est de Yellowknife. On a poursuivi les forages au diamant jusqu'au mois d'août. Les travaux ont révélé une zone minéralisée renfermant, par pied vertical, du minerai d'une teneur de .16 once d'or par tonne.

### Arvik Mines

Pendant l'été, on a continué les forages au diamant à la mine et dans certaines zones voisines. On a entrepris des études de rentabilité.

### Camlaren Mine

Au cours des mois d'août et de septembre, l'installation de forage de la Camlaren, située au lac Gordon, a creusé jusqu'à 840 pieds, à partir d'une profondeur de 380 pieds. On poursuit le forage au niveau inférieur de la zone minéralisée. On soupçonne certaines richesses aurifères.

### Nanisivik Mine

Les travaux de creusage des fondations du moulin ont commencé et une équipe est sur les lieux afin d'entreprendre un programme d'aménagement de 8,000 pieds de galeries souterraines. Le gouvernement fédéral détient maintenant des actions minoritaires dans cette société.

### Silver Bay

La Northrim Mines Ltd. a affecté une équipe à l'ancienne concession d'argent Federated, située sur les rives de la rivière Camsell. Cette équipe a réaménagé le moulin et le camp. On projette de forer une galerie en pente dans la structure actuelle du filon afin d'obtenir une éponte de 400 pieds sous le gisement d'argent exploité il y a deux ans.

## COLLOQUES GÉOSCIENTIFIQUES - WHITEHORSE ET YELLOWKNIFE

Deux colloques géoscientifiques réunissant des représentants du gouvernement et de l'industrie ont eu lieu en décembre à Whitehorse et à Yellowknife, auxquels ont assisté un bon nombre de géologues d'exploration, de prospecteurs des territoires et d'hommes d'affaire locaux. A Whitehorse, le nombre d'inscrits s'élevait à 152 et, à Yellowknife, à 144, soit un ou plusieurs délégués de 71 sociétés qui s'intéressent activement à la prospection et à l'exploitation minière et de 15 sociétés de services miniers. Les autres participants étaient des prospecteurs locaux et des géologues de la Commission géologique du Canada et du ministère des Affaires indiennes et du Nord canadien.

Ces colloques ont été présentés conjointement par la Commission géologique du Canada (ministère de l'Énergie, des Mines et des Ressources), la Direction des ressources naturelles et de l'environnement du Nord (ministère des Affaires indiennes et du Nord canadien) et les Chambres des mines du Yukon et des Territoires du Nord-Ouest.

lors des colloques géoscientifiques, des géologues résidents ont révélé les faits saillants suivants au sujet de la prospection dans le Nord:

#### Yukon 1974

L'activité d'exploration orientée vers la découverte et l'évaluation de gîtes miniers, à l'exception de la prospection pétrolière, a entraîné des dépenses d'environ \$12 millions. Le nombre de travaux fut plus élevé que celui des années précédentes, sans toutefois être en rapport direct avec le chiffre des dépenses, car une grande partie des travaux d'exploration de 1974 ont été exécutés dans des régions moins faciles d'accès du territoire, les coûts liés aux opérations logistiques étant plus élevés. Voici quelques-uns des éléments fondamentaux de cette activité:

- 1) Au cours de 1972 et 1973, on a fait des découvertes intéressantes au Yukon et dans les régions immédiatement voisines du district de Mackenzie.
- 2) Le prix des métaux communs, spécialement le zinc, a été tel que la production pourrait être avantageuse pour les gisements isolés qui ne renferment pas des quantités importantes de métaux d'une grande valeur unitaire.
- 3) Les lignes de conduite et les dispositions réglementaires qui interdisent l'exploration dans les autres régions ont favorisé les efforts dans ce domaine au Yukon.

1974 a été une année exceptionnelle pour l'exploration minière dans les Territoires du Nord-Ouest. On évalue à environ \$18 millions les sommes consacrées à la prospection au cours de l'année. Ces fonds ont servi à la recherche de métaux communs, à la prospection d'uranium et à l'examen de concessions d'or et d'argent dans les Territoires. Au 1<sup>er</sup> décembre 1974, on avait jalonné environ 11,500 concessions minières et délivré 39 nouveaux permis de prospection, portant ainsi le chiffre des concessions totales exploitées à 49,000 et le nombre des permis valables, à 67. A l'heure actuelle, il ne fait aucun doute que 1975 sera une année encore plus active pour les équipes d'exploration minière dans les Territoires du Nord-Ouest.

Parmi les réalisations les plus encourageantes, on signale:

- 1) La découverte, par la Cominco Ltd., d'une troisième zone minéralisée, la zone du lac Boot, dans la concession de la Bathurst Norsemines Ltd. située sur les rives de la rivière Hackett.
- 2) Le forage, par la Yava Syndicate (Conwest Exploration Co. Ltd. et Brascan Resources Ltd.) d'un gisement de plomb-zinc à trente milles au sud de la rivière Hackett, au lac H. Ce gisement se trouve dans des matières volcanique acides, sur le flanc opposé d'un synclinal qui part de la concession de la Bathurst Norsemines Ltd. et, par conséquent, présente une masse importante de roches favorables.
- 3) La découverte, par la Texasgulf Inc., d'un gîte de cuivre à l'est du lac Ta-  
siyuak. Ce gisement fut traversé par cinq forages et le recouplement moyen de 34  
pieds contient du minerai ayant une teneur de 4.47% de cuivre, 1.3 onces d'argent,  
0.83% de zinc et de faibles quantités de plomb et d'or.

) La découverte, par la Rio Tinto Canadian Exploration Ltd., la Serem Ltd. et la Welcome North Mines Ltd., de longues zones minéralisées dans des formations datant du paléozoïque inférieur (surtout la formation Sekwi) au nord et à l'est de la découverte Bonnet Plume de Barrier Reef. Cette découverte a donné lieu à de nombreux travaux de jalonnement dans le cours supérieur de la rivière Arctic et de la rivière Gayna.

) La découverte, par la Gemex Minerals Ltd., au cours de forages, d'un gisement de cuivre-zinc au lac Heninga, dans le district du Keewatin. La St. Joseph Explorations Ltd. a obtenu dernièrement une option sur ce gisement et envisage d'effectuer des travaux supplémentaires de forage. Nombre d'autres gisements intéressants sont l'objet de travaux préliminaires d'évaluation.

au prochain quarante-troisième congrès annuel des prospecteurs et exploitants, qui se déroulera à Toronto, en mars, MM. D.B. Craig et R.W. Hornal, géologues résidents, présenteront une communication résumant, dans un cas, l'activité d'exploration minière de 1974 au Yukon et, dans l'autre cas, celle dans les Territoires du Nord-Ouest. Les personnes intéressées à l'industrie minière dans le Nord du Canada peuvent assister à ces exposés et rendre visite à notre kiosque d'information à la salle Ontario.
